

## Construction Careers – Online Resources

**The WiC team has put together some suggested online resources to help you research the industry and your potential new career path from home.**

**There are a variety of websites, blogs and content online that will give you a great insight into working in construction – from virtual site tours to interviews with staff, online career quizzes to detailed job role information.**

WiC has not created any of the suggested reading ourselves, so cannot take credit nor responsibility for its contents, but we hope this provides you with some engaging and informative research that you can enjoy from home during this time.

---

## Women into Construction

Visit our [website](#) to research current job opportunities and see who our members are. These are companies who work with us to actively address the gender imbalance in the industry.

You can also follow us on Social Media. We post industry content, case studies and links to our events across our platforms and would love you to join us.

Have you created your [LinkedIn page](#)? It's a fantastic tool to network, show potential employers your skills and experience and to hear about all the latest opportunities. Feel free to contact your WiC Project Manager for advice on setting up your page.
